SUMMARY

Full Stack Developer with hands-on experience building production-grade MERN and ERPNext (Frappe) applications serving 10000+ users. Skilled in designing scalable REST APIs, implementing secure RBAC/JWT authentication, and optimizing database performance (30–40% improvements). Proven ability to automate real-world business workflows and deliver high-impact solutions in production environments.

EXPERIENCE

Extension Technologies

Dec 2025 – Present

Software Developer Intern

Faridabad

- Engineered custom ERPNext modules using Python/Frappe, automating 5+ business workflows and reducing manual processing time by 25%.
- Designed validation pipelines ensuring data integrity across modules, cutting human errors by 30%.
- Optimized MySQL queries using composite indexing, reducing API response time by 35%.
- Implemented RBAC-based access control and resolved critical production issues, maintaining 99% system uptime.
- Worked on production ERP systems used by real business clients, improving reliability and scalability.

Shadowfox

Sep 2025 – Nov 2025

Software Developer Intern

Remote

- Developed MERN-based internal tools replacing manual workflows and improving operational efficiency by 20%.
- Designed scalable REST APIs using Node.js/Express with MVC architecture.
- Implemented secure JWT-based authentication with token expiry and refresh mechanisms.
- Improved frontend performance by 40% using React lazy loading and optimized MongoDB queries by 30%.

PROJECTS

Wedding Bureau Management System (Client Project)

MERN | JWT | RBAC

- Delivered a production-grade matchmaking platform for a paying client serving 300+ users across multiple roles.
- Optimized MongoDB schema using compound indexing, reducing API response time by 30% and improving page load speed by 25%.
- Implemented granular RBAC middleware securing 10+ routes and preventing unauthorized access.

Smart Restaurant Management System | Live Demo

MERN | QR Integration

- Engineered a QR-based ordering system automating the customer-to-kitchen workflow and reducing order errors.
- Built real-time dashboards for admins and users; optimized backend APIs, reducing server overhead by 20%.

Taja Thela Marketplace | Live Demo

MERN | Geolocation APIs

- Architected a three-sided marketplace with role-based dashboards for vendors, customers, and delivery partners.
- Integrated geolocation-based filtering (5–10 km radius), reducing data retrieval time by 22%.

TECHNICAL SKILLS

Core: MERN Stack, Frappe/ERPNext

Languages: JavaScript (ES6+), Core Java

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL (Indexing, Optimization)

Security: JWT, RBAC

Tools: Git, GitHub, Postman, Docker, AWS

CERTIFICATIONS & COURSES

Full Stack Web Development — Sheryians Coding School

2025

MERN stack, REST API design, JWT authentication, and deployment

EDUCATION

B.Tech in Computer Science

2022 – 2026

KCC Institute of Technology and Management, Greater Noida

CGPA: 7.8 / 10
